

Transfer of securities to BNP Paribas Arbitrage Issuance B.V. (“BNPP IBV”) pursuant to Part VII of the UK Financial Services and Markets Act 2000

On 19 November 2015, The Royal Bank of Scotland plc (with its registered office at 36 St Andrew Square, Edinburgh, Scotland) (“**RBS**”) and BNP Paribas S.A. (incorporated in France and with its registered office at 16, Boulevard des Italiens, 75009 Paris, France) (“**BNPP**”), acting through its London Branch, announced that the Court of Session in Scotland had approved and sanctioned the implementation of a banking business transfer scheme, whereby certain assets and liabilities related to RBS’s structured retail investor products and equity derivatives business would be transferred to BNPP pursuant to Part VII of the UK Financial Services and Markets Act 2000 (the “**Part VII Scheme**”).

The Part VII Scheme took effect on 7 December 2015 (the “**Effective Date**”).

On the Effective Date, BNPP, acting through its London Branch, became the issuer of those securities originally issued by RBS that were transferred pursuant to the Part VII Scheme. Immediately after the transfer of those securities to BNPP, acting through its London Branch, the role of the issuer under those securities was transferred, also under the terms of the Part VII Scheme, to BNPP IBV, a wholly owned subsidiary of BNPP. As part of the Part VII Scheme, BNPP guarantees all the obligations of BNPP IBV arising in respect of the transferred securities.

Under the Part VII Scheme, amendments were made to the terms of the transferring securities and to agreements related to them from the Effective Date in order to give effect to the Part VII Scheme, including (but not limited to) references to “RBS”, in its capacity as issuer of the transferred securities, being construed as references to “BNPP IBV”.

Details of the securities that have transferred under the Part VII Scheme as well as further information on the Part VII Scheme generally can be viewed at <http://warrants.bnpparibas.com/>

APPENDIX A - RISK FACTORS

An investment in the Certificates entails significant risks not associated with similar investments in a conventional debt or equity security, including the following:

1. Commodity Market Risk: Level of the Underlying

The Certificates entitle the Certificateholder of a Certificate to receive the Settlement or Early Termination Amount from the Issuer on the Settlement Date. Investors are therefore at risk that the level of the Underlying Commodity may cause the Settlement or Early Termination Amount to be less than the amount paid for the Certificates. Accordingly, this investment bears the market risk of a direct commodity investment and investors are cautioned to take advice accordingly. The historical level of the Underlying should not be taken as an indication of the Underlying's future performance during the term of the Certificates.

2. Secondary Market Risk

The price of the Certificates will be affected by a number of factors independent of the creditworthiness of the Issuer and the price of the Underlying Commodity, including, but not limited to, market interest, exchange rates and yield rates. Further, the price of the Underlying Commodity itself depends on a number of interrelated factors, including economic, financial and political events around the world, including factors affecting capital markets and commodity markets generally and the commodity exchanges on which the Underlying Commodity has its primary listing. The price at which a Certificateholder will be able to sell Certificates prior to the Early Termination Date or Expiration Date may be at a discount, which could be substantial, to the value of the Certificates at the Issue Date, if, at such time, the price of the Commodity is equal to or not sufficiently above the price of the Commodity at the Issue Date.

3. Liquidity

The Issuer cannot provide any assurances as to how the Certificates will trade in the secondary market or whether such market will be liquid or illiquid. Application has been made to list the Certificates on the SWX Swiss. No assurance can be given that there will be a market for the Certificates. If the Certificates are not traded on any exchange, pricing information for the Certificates may be more difficult to obtain, and the liquidity and prices of the Certificates may be adversely affected.

4. Conflicts of interest

Potential conflicts of interest may exist between the Calculation Agent and Certificateholders, including with respect to certain determinations and judgements that the Calculation Agent may make pursuant to the Conditions that may influence the amount receivable upon settlement of the Certificates.

Investors should consult their own business, tax, legal and accounting advisors with respect to this proposed transaction and they should refrain from entering into a transaction with us unless they have fully understood the associated risks and have independently determined that the transaction is appropriate for them.
