**REDEMPTION**

In case no Early Redemption has occurred, the following applies. The Coupon Amount(s) per Product will be paid in any case at the respective Coupon Payment Date(s). In addition the Investor is entitled to receive from the Issuer on the Redemption Date per Product:

**Scenario 1** If the Final Fixing Level of the Underlying with the Worst Performance is at or below the respective Strike Level, the Investor will receive a round number (i.e. Conversion Ratio) of the Underlying with the Worst Performance per Product. Any potential fractional Conversion Ratio entitlements (Fraction of Underlyings) will be paid in cash, based on the Final Fixing Level. Fractions of Underlyings will not be cumulated.

**Scenario 2** If the Final Fixing Level of the Underlying with the Worst Performance is above the respective Strike Level, the Investor will receive a Cash Settlement in the Settlement Currency equal to:  
Denomination

**Initial Fixing Level** Official close of the respective Underlying on the Initial Fixing Date on the Related Exchange, as determined by the Calculation Agent.

**Final Fixing Level** Official close of the respective Underlying on the Final Fixing Date on the Related Exchange, as determined by the Calculation Agent.

**Worst Performance** For each Underlying the performance is calculated by dividing its Final Fixing Level by the respective Initial Fixing Level. The Worst Performance corresponds to the lowest of all so calculated values, as determined by the Calculation Agent.

**Early Redemption** On each Early Redemption Observation Date, the Issuer has the right, but not the obligation to call all Products for Early Redemption on the respective Early Redemption Date.

On the respective Early Redemption Date the Investor will receive a Cash Settlement in the Settlement Currency equal to the Denomination, plus the Coupon Amount for the respective Coupon Payment Date. No further payments will be made thereafter.

Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the Products. Such occurrences can have an effect on the time of redemption and/or on the value of the Products.

In special market situations, where the Issuer and/or the Lead Manager is/are unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks of the Issuer and/or the Lead Manager.

### **Illiquidity Risk**

One or, if applicable, more of the Underlyings might be or become illiquid over the life time of the Product. Illiquidity of an Underlying might lead to larger bid/offer spreads of the Product and/or to an extended time period for buying and/or selling the Underlying respective to acquire, unwind or dispose of the hedging transaction(s) or asset(s) or to realise, recover or remit the proceeds of such hedging transaction(s) or asset(s) which might implicate a postponed redemption or delivery and/or a modified redemption amount, as reasonably determined by the Calculation Agent.
