Changes that are unplanned or not agreed

Terms and conditions

Information about any changes that are unplanned or not agreed contractually (e.g., capital transactions that affect the underlying assets such as splits, par-value reimbursements or conversions) shall be provided at www.bcv.ch/invest.

To be informed of these changes directly, you can sign up on the website and add this product to your favorites. You will then receive alerts concerning the product by email.

Redemption of Certificate

The redemption amount in CHF will be calculated by:

- Multiplying the average price of each security at the final fixing by the quantity of each security in the basket;
- Converting securities not denominated in CHF at the exchange rate set by the Issuer at the final fixing; and
- Adding the total amount remaining in the cash component.

The formula is as follows:

$$\sum_{i=1}^N n_i \times P_i \times X_i + C$$

where P_i is the average sale price of security i during the final fixing period on the reference exchange

n_i is the number of security i in the basket during the final fixing period

X_i is the exchange rate between the currency of security i and USD

N is the total number of securities in the basket

C is the amount of the cash component per Certificate

Liquidity risk at the moment of redemption

If daily liquidity strongly influences the sale of the component stocks of the Certificate, the issuer reserves the right to place sale orders over several days in order to prevent repercussions on the redemption price of the Certificate.

Issuer's right of termination

The Issuer has the right to terminate all Tracker Certificates in circulation at any time, but no earlier than 9 months after the issue date (please note that if the total number of Certificates in circulation falls below 2,000, the Issuer will automatically undertake redemption of all Certificates). The termination must be announced at least 1 month prior to the effective termination date. The redemption amount will be calculated on the effective termination date.

If during the product's lifetime the Certificate's price drops to 25% of its issue price or below, the Issuer may also immediately terminate the Tracker Certificates without prior notice. The effective termination date shall be announced as soon as possible.

Investor's right of termination

Investors may sell their Tracker Certificates on the secondary market. They also have the right to terminate any or all of the Certificates they hold provided that the Issuer has not already exercised its right of termination. The investor may do so once per quarter, on the last Tuesday of the quarter, but no earlier than 9 months after the issue date. The notice of termination must be sent to the calculation agent at least 1 month before the effective termination date, in line with the termination procedure set out below. The redemption amount will be calculated on the effective termination date.

Termination procedure for investors

For the investor's termination to be valid, the Issuer must not have already exercised its right of termination, and the termination notice must be received by the calculation agent at least 1 month before the effective termination date. This notice may be made via mail or email to the addresses provided under "Contact information: product redemption."

The investor's custodian bank must include the following information in its message to the calculation agent:

- name, address and clearing number
- the Tracker Certificate's security number
- the number of Tracker Certificates involved
- the effective termination date (must be at least 1 month after the notice is received by the Issuer)

The calculation agent will confirm the termination to the investor's custodian bank, specifying in particular the effective termination date.

2. PROFIT AND LOSS EXPECTATIONS

Market forecast

This Certificate is designed to take advantage of a rise in the valuation of companies included in the basket.

Potential profit

During the product's lifetime, holders of the Certificate can earn a profit if the product's market price is greater than its issue price. The potential return on the Certificate at the final fixing is comparable to the return on the underlying assets and directly depends on the quality of the investment decisions made by the Investment Manager.

Potential loss

A loss may be realized if the product is sold during its lifetime or if it is redeemed at less than the issue price at the final fixing. The product is issued in USD and includes securities denominated in foreign currencies. Decreases in the exchange rates of these currencies against the USD may cause the price of the Tracker Certificate to drop.

The Investment Manager assumes full responsibility for selecting the initial composition of the basket and for the subsequent rebalancings. The Issuer is not in any way responsible for the impact that these choices may have on the value of the Certificate or any losses that may affect investors.

Before conducting any transaction, investors should evaluate their risk profile and seek information from their advisor on inherent risks, and are urged to read the Swissbanking brochure "Special Risks in Securities Trading."</p> <p>Issuer risk: Investors are exposed to the risk of insolvency of the Issuer, which could lead to a partial or total loss of the invested capital.</p> <p>Whether an investment product retains its value does not depend solely on the performance of the underlying asset(s) but also on the solvency of the Issuer, which may change during the product's lifetime.</p> <p>The rating stated in this document for the Issuer was valid at the time of issuance and may change during the product's lifetime.</p>
Market liquidity	<p>Under special market conditions, if the Issuer is unable to enter into hedging transactions, or if such transactions prove difficult, the spread between bid and ask prices may be temporarily expanded in order to limit the economic risks for the Issuer.</p>
