Redemption

The Investor is entitled to receive from the Issuer an amount converted in the Redemption Currency, according to the following scenarios:

Scenario 1 (in case of Issuer Call or Investor Exercise)	If a Knock-Out Event has NOT occurred , the Investor will receive on the Redemption Date the Redemption Amount, taking into account the Conversion Ratio, converted into the Redemption Currency, if applicable.
Scenario 2	If a Knock-Out Event has occurred , the Warrant expires immediately and worthless.
Redemption Amount	Settlement Price - Current Strike
Settlement Price	Official closing value of the Underlying on the Relevant Exchange on the Valuation Date, as determined by the Index Sponsor.
Current Strike / Knock-Out Barrier	<p>The Current Strike / Knock-Out Barrier (SL) will be determined by the Calculation Agent on a daily basis commencing from the Initial Strike / Knock-Out Barrier in accordance with below formula, and rounded to USD 0.0001; it will be readjusted before market opening on a daily basis.</p> <p>The Current Strike / Knock-Out Barrier will be available on www.ubs.com/keyinvest or any successor page.</p> $SL_{\text{new}} = SL_{\text{old}} + \frac{(R + FS) \cdot SL_{\text{old}} \cdot n}{360} - \text{Dividend} \cdot \text{DivFactor} + \text{DivCosts}$
SL _{new}	Current Strike / Knock-Out Barrier after the adjustment.
SL _{old}	Strike / Knock-Out Barrier before the adjustment.
Financing Spread ("FS")	Will be set between 0.5% and 15%, as determined by the Calculation Agent. The Initial Financing Spread is 3.5%.
Rate ("R")	The prevailing overnight rate for deposits (SOFR) in the Strike / Knock-Out Barrier Currency as determined by the Calculation Agent on the relevant adjustment date.
Dividend	Dividend or similar payments, as determined by the Calculation Agent at its reasonable discretion, distributed to the holders of the Underlying, whereby the ex-date of such payment on the Related Exchange is between the current and the next following Business Day.
DivFactor	The DivFactor may reflect any taxation applied on Dividends. The DivFactor is between 0 and 1 and is determined at the Calculation Agent's reasonable discretion.
DivCosts	The DivCosts (applicable only in case of performance indices as Underlying) means an amount, which increases following the relevant Adjustment Date, on which the relevant share of the company included in the Underlying is traded "ex dividend", the Strike _{old} / Knock-Out Barrier _{old} . The DivCosts are determined at the Calculation Agent's reasonable discretion as being those taxes or other charges and costs, which are levied in the context of the distribution of the dividends by way of any withholdings, to the extent that these may not be credited.
n	Number of calendar days between the current adjustment date (exclusive) and the next adjustment date (inclusive).
Strike / Knock-Out Barrier Currency	USD
Knock-Out Event	A Knock-Out Event shall be deemed to occur if at any time on any Exchange Business Day, starting on the Launch Date, the level of the Underlying quoted by the Relevant Exchange is at or below the Current Knock-Out Barrier, as reasonably determined by the Calculation Agent.

Product Structure

The Open End Turbo Call Warrant allows investors to profit from the upward (bullish) trend of an Underlying. The Open End Turbo Call Warrant moves approximately 1 unit of currency up, if the Underlying moves 1 unit of currency up and vice versa taking into account the conversion ratio, FX exchange rate and the adjustments of the Strike / Knock-Out Barrier. The risk of loss is limited to the invested capital.

If the value of the Underlying at any time during the product life time lies at or below the Current Knock-Out Barrier, the Open End Turbo Call Warrant expires immediately and worthless.

The Current Knock-Out Barrier is always equal to the Current Strike.

Tax Treatment for dividend payments on index components

Each Investor should note that since this Product references an Index, then regardless of whether any such Index is a net price return, a price return or a total return index, the payments made by the Issuer under the Product will reflect the gross dividend payments paid by the issuers of the securities comprising the relevant Index less applicable withholding tax amounts in respect of such gross dividends. In the case of U.S. source dividends, these withholding tax amounts will be paid by or on behalf of the Issuer to the U.S. Internal Revenue Service in accordance with the U.S. withholding tax rules under Section 871(m).

Tax Treatment Switzerland

Swiss Transfer Stamp Duty	The product does not qualify as a taxable security. Transactions are not subject to Swiss Stamp Duty.
Swiss Income Tax	For private investors resident in Switzerland, an investment in this product is not subject to income tax.
Swiss Withholding Tax	This product is not subject to the Swiss Issuer Withholding Tax. It depends on the jurisdiction of the issuer whether a foreign issuer withholding tax applies.

The tax information only provides a general overview over the Swiss tax consequences linked to this product based on the tax laws and the practice of the tax administration at the time of issue. Tax laws and the practice of tax administrations may change, possibly with retroactive effect.

Classification

This Product does not represent a participation in any of the collective investment schemes pursuant to Art. 7 ff of the Swiss Federal Act on Collective Investment Schemes (CISA) and thus does not require an authorisation of the Swiss Financial Market Supervisory Authority (FINMA). Therefore, Investors in this Product are not eligible for the specific investor protection under the CISA. Moreover, Investors in this Product bear the issuer risk.

Furthermore, this Product does not benefit from any depositor protection under Art. 37a under the Swiss Federal Law on Banks and Savings Banks (Banking Act) or other forms of deposit insurance under any other law as might be applicable to this Product.

2. Prospects of Profits and Losses

Market Expectation	Investors expect the Underlying to increase in value and accordingly expect to benefit from a leveraged performance relative to the Underlying. In any case Investors expect that no Knock-Out Event will occur. Investors should note that the volatility of the Underlying will influence the value of the Product.
Effect of the performance of the Underlying on redemption amount or on delivery obligation:	
- Positive performance	In case the Underlying increases in value, the value of the Product increases with a leverage factor. In any case the financing costs of the Product have a negative effect on the performance of the Product if it is held more than a day.
- Sideways to slightly negative performance	In case the Underlying value performs sideways to slightly negative, the value of the Product will remain constant or decreases in value according to the leverage factor. In any case the financing costs of the Product have a negative effect on the performance of the Product if it is held more than a day.
- Pronounced negative performance	In case the Underlying decreases in value, the value of the Product decreases with a leverage factor. In any case the financing costs of the Product have a negative effect on the performance of the Product if it is held more than a day.
Maximum Return	The profit potential is unlimited.

Maximum Loss In case of a Knock-Out Event, the Product becomes worthless and Investors lose all of their initial investment.

3. Significant Risks for Investors

General risk warning Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the Underlying(s). The following is a summary of the most significant risks. Further risks are set out in the Product Documentation.

Risk Tolerance Investors bear a high risk of losing their entire investment in this Product. Investors should be experienced and familiar with both leverage products and the underlying asset class of this Product.

Product specific risks

Loss Potential	Investors lose in the worst case all of their initial investment.
Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Underlying	Due to the leverage factor, the value of the Product generally fluctuates more than the value of the Underlying. An investment in the Product therefore bears a higher risk than a direct investment in the Underlying. In case of a Knock-Out Event, the Product becomes worthless, while the Underlying still has a value.
Issuer Call right	Yes. Please refer to the respective definition in Section 1, «General Information».
Knock-Out Event	Yes. Please refer to the respective definition in Section 1, «Redemption».
Currency risk	As the Settlement Currency is different from the currency in which the Underlying is denominated, the value of this Product is exposed to the corresponding FX exchange rate.
Extraordinary termination risk	The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not entitled to request any further payments on the Product after the termination date.
Adjustment risk	Potential Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its concept (e.g. corporate events of a company whose shares constitute an Underlying, market disruption events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.
Illiquidity risk in secondary market	The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid and/or offer prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and/or offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices. Potential Investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential Investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, Investors might

sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market Investors may receive less than the capital invested.

In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.

Market Disruption risk

Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product Documentation.

Withholding tax

Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). **Any payments due under this Product are net of such tax.** Please refer to the Product Documentation for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.

Risk Factors relating to the Issuer

In addition to the market risk with regard to the development of the Underlying, each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank pari passu with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings at any given time can be seen on the Issuer's website (www.ubs.com) under "Analysts & Investors".
