1. Product Description

LUKB Actively Managed Tracker Certificates offer Investors the opportunity to replicate the price movement of the Basket and thus to participate in its development. The risk/return profile of this Product is comparable to the risk/return profile of the Basket. The Basket consists of several components (the «Basket Components») and represents the Underlying of this Product. The Basket is **dynamic** and managed **discretionary** by the Investment Advisor during the lifetime of the Product. The Investment Advisor composes the Basket in line with the Investment Strategy at his own discretion and can amend the composition at any time. Thus, the performance of the Basket depends on the Investment Strategy pursued by the Investment Advisor and its implementation. This Product provides variable annual payments as compensation for the sum of the proportional net dividends, net coupons resp. net distributions paid by the Basket Components.

Investment Strategy

A solid company will usually continue to distribute profits to shareholders in the form of dividends even in difficult phases, even if profits decline in the short term. So the amount of dividends paid out each year is much more stable than the company's profits. In this way, dividend payments ensure regular income for investors, even in times of crisis. High-dividend companies can therefore provide long-term stability for equity investments and the dividend could be an important component of the success of an equity investment. The basket combines high-dividend Swiss companies that are carefully selected by LUKB Research. The underlyings are selected based on the qualified market assessment of the investment Advisor. The investment strategy does not involve leverage and is implemented in accordance with the investment guidelines. These guidelines provide for a maximum investment degree of 100% and a weighting of the individual basket components between a minimum of 0% and a maximum of 100%. In addition, the number of basket components is between a minimum of 10 and a maximum of 70. The basket contains a cash position.

Further information on the Investment Strategy, the Investment Guidelines and the Investment Restrictions - if available - can be obtained free of charge from the Issuer: Luzerner Kantonalbank AG Structured Products, Pilatusstrasse 12, 6003 Lucerne, Email: structuredproducts@lukb.ch.

Underlying Universe

The securities universe consists of Swiss companies, which the investment advisor selects as part of the implementation of the investment strategy. Equity securities such as shares, participation certificates and dividend-right certificates as well as Exchange Traded Funds (ETFs) that are listed or admitted to trading on the SIX Swiss Exchange are permitted as underlyings. Collective investment schemes are permitted as underlying instruments provided the collective investment scheme is listed or admitted to trading on SIX Swiss Exchange or on a foreign securities exchange with equivalent regulation. Collective investment schemes that are neither on SIX Swiss Exchange nor on a foreign securities exchange with equivalent regulation listed or admitted to trading are permitted as underlyings if they hold an approval or sale authorisation of FINMA. In addition to the assets mentioned, a cash position may be included in the basket as a basket component. The Cash Position is in the currency of the product. The Cash Position does not bear interest, however the Issuer reserves the right to charge negative interest rates in the future. The cash position may not exceed 10% of the product value.

Implementation of the Investment Strategy

The Investment Advisor is solely responsible for the implementation and compliance of the Investment Strategy and decides solely on the composition and reallocation (rebalancing) of the Basket. The Issuer has no obligation to monitor this, but reserves the right to refuse to accept a new Basket Component by the Investment Advisor without giving any reasons.
