1. Product Description

LUKB Actively Managed Tracker Certificates offer Investors the opportunity to replicate the price movement of the Basket and thus to participate in its development. The risk/return profile of this Product is comparable to the risk/return profile of the Basket. The Basket consists of several components (the "Basket Components") and represents the Underlying of this Product. The Basket is **dynamic** and managed **discretionary** by the Investment Advisor during the lifetime of the Product. The Investment Advisor composes the Basket in line with the Investment Strategy at his own discretion and can amend the composition at any time. Thus, the performance of the Basket depends on the Investment Strategy pursued by the Investment Advisor and its implementation. This Product provides variable annual payments as compensation for the sum of the proportional net dividends, net coupons resp. net distributions paid by the Basket Components.

Investment Strategy

The objective of the strategy is to increase the real investment value over the medium term. Investments are made in bonds and equities that generate regular interest income or dividends. Equity investments account for around 45% and, together with alternative investments, slightly more than 50% of the portfolio. The AMC is suitable for investors who prefer a balanced portfolio. The equity quota is implemented primarily through collective investments to achieve the best possible risk diversification. The bond allocation is supplemented by individual investments in addition to funds / ETFs. Alternative investments (among others also hedge funds) and structured products can be used to optimize the risk/return profile. The underlyings are selected based on the qualified market assessment of the Investment Advisor.

The Investment Strategy does not involve leverage and is implemented in accordance with the Investment Guidelines. These guidelines provide for a maximum investment degree of 100% and a weighting of the individual basket components between a minimum of 0% and a maximum of 100%. In addition, the number of basket components is between a minimum of 10 and a maximum of 60. The basket contains a cash position.

Further information on the Investment Strategy, the Investment Guidelines and the Investment Restrictions - if available - can be obtained free of charge from the Issuer: Luzerner Kantonalbank AG Structured Products, Pilatusstrasse 12, 6003 Lucerne, Email: structuredproducts@lukb.ch.

Underlying Universe

Equity securities such as shares, participation certificates, profit-sharing certificates and Exchange Traded Funds (ETFs) that are listed or admitted to trading on SIX Swiss Exchange or on a foreign securities exchange with equivalent regulation are permitted as underlying instruments. Collective investment schemes are permitted as underlying instruments provided the collective investment scheme is listed or admitted to trading on SIX Swiss Exchange or on a foreign securities exchange with equivalent regulation. Collective investment schemes that are neither on SIX Swiss Exchange nor on a foreign securities exchange with equivalent regulation listed or admitted to trading are permitted as underlyings if they hold an approval or sale authorisation of FINMA. Bonds traded on a recognised stock exchange or, with the prior consent of the issuer, on other recognised trading venues are permitted as underlyings. All Structured Products that are listed or admitted to trading on SIX Swiss Exchange are permitted as underlying instruments. Also permitted are Structured Products that are listed or admitted to trading on a foreign securities exchange with equivalent regulation and that would also be eligible for listing on SIX Swiss Exchange.

The underlyings are selected by the Investment Advisor as part of the Investment Strategy implementation. The Investment Advisor regularly consults the Strategy Advisor to make decisions regarding tactical positioning.

In addition to the above underlyings, a Cash Position is used as a Basket Component and is included in the Basket. The Cash Position is in the currency of the product. The Cash Position does not bear interest, however the Issuer reserves the right to charge negative interest rates in the future. The cumulative share of the Cash Position and the debt securities with interest component may not exceed 50% of the product value.

At the discretion of the Investment Advisor, the FX risk can be hedged against its certificate currency with automated FX swaps on a daily rollover basis (Spot/Next). Whether and which currencies can be hedged is determined in exchange with the Issuer. Any PnL derived from this hedging activity will be considered in the determination of the Redemption Amount.

Implementation of the Investment Strategy

The Investment Advisor is solely responsible for the implementation and compliance of the Investment Strategy and decides solely on the composition and reallocation (rebalancing) of the Basket. The Issuer has no obligation to monitor this, but reserves the right to refuse to accept a new Basket Component by the Investment Advisor without giving any reasons.

Current composition of the Basket

The current composition of the Basket can be obtained from the Issuer at any time or can be found on the Issuer's website at structuredproducts.lukb.ch.

Issuer Call

The Issuer has the right to terminate all outstanding Products for the purpose of early redemption without giving any reason on a quarterly basis on February 04, May 04, August 04 and November 04 (modified following, for the first time in November 2024) ("Termination Date"). For further information on the Issuer Call,

please refer to Section 5.1.13 of the General Terms and Conditions of the Base Prospectus.

Extraordinary right of termination of the Issuer

If changes in the Basket are planned or have already been made, which, in the sole opinion of the Issuer, are such that a continuation of the Products does not appear appropriate, the Issuer has the right to terminate at any time all outstanding Products for the purpose of early redemption without giving any reason on a freely determined Termination Date.

The corresponding notification must be published as soon as possible, stating the Termination Date.

Investor Put

Subject to prior notice by the Issuer, each Investor has the right to terminate its Products on a quarterly basis on February 04, May 04, August 04 and November 04 (modified following, for the first time in November 2024) ("Termination Date"). The Investor must provide the Paying Agent with a duly completed and signed termination notice (with the information in accordance with section 5.1.13 ii. b. of the General Terms and Conditions of the Base Prospectus) no later than 10 Business Days before the Termination Date by letter mail or by email (Luzerner Kantonalbank AG Structured Products, Pilatusstrasse 12, 6003 Luzern, structuredproducts@lukb.ch). By submitting the termination notice, the Investor undertakes not to transfer the terminated Products. If the Investor has deposited the Products at a third bank (custodian bank), he must also inform them in good time about the exercise of the termination.

Redemption at Termination Date

The Redemption Amount is determined by the Calculation Agent on the Termination Date. The Redemption is made 5 Business Days after the Termination Date. The Issuer may extend the determination of the Redemption Amount to several days at its sole discretion if it considers this necessary due to current market conditions (such as liquidity in the Basket Components). The corresponding notification must be published at least 10 Business Days in advance. The Redemption will then be made 5 bank business days after the calculation of the Redemption Amount by the Calculation Agent.

Notices / Adjustments

The Terms and Conditions of this Product may be subject to Adjustments over the lifetime of this Product (e.g. due to Corporate Actions). Notices with respect to Adjustments and all other notices to Investors shall be made on the website of the Issuer at structuredproducts.lukb.ch/services/notices or any successor website. With the valor search function (Valorensuchfunktion) such Products can be located. If this Product is listed on an Exchange, the notices will be published in accordance with the rules issued by the relevant Exchange on the relevant Exchange website.

Market Disruption Event

If the Issuer and/or the Calculation Agent determines, in its reasonable discretion, that a day relevant for the determination of the price of one or some of the components of the Underlying (each an "Affected Component") is a Disrupted Day then the Issuer and/or the Calculation Agent shall determine the relevant price of the Affected Component in its reasonable discretion taking into account established market practice, including, but not limited to, using the most recently traded price or a fair value established at its sole discretion.

"Disrupted Day" means any Business Day on which any relevant exchange fails to open for trading during its regular trading session or on which an event has occurred that disrupts or impairs (as determined by the Issuer and/or Calculation

Thereafter Potential Investors should consider the additional risk factors in the Base Prospectus.

Hence, Investors bear the risk that the financial situation of the Issuer could deteriorate and the Issuer of the Product may become insolvent. In this case all forthcoming and thus not yet occurred compensation payments will also be affected by such insolvency and not be paid. The Product's value is therefore not only dependent on the performance of the Underlying(s) but also on the creditworthiness of the Issuer, which may change over the term of the Product. Potential Investors should note that there is no guarantee of a specific liquidity or a specific spread (difference between bid and ask prices) or any prices at all. Hence, Potential Investors should not rely on the possibility to buy or sell the Product in a specific point in time or to a specific price. By selling the Product in the secondary market Investors may receive less than the invested capital.

In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with this Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.

Sales of Products by the Issuer on the secondary market lead to a temporary increase of the Cash Position and to a temporary relative reduction of all other Basket Components. In contrast, repurchases of Products by the Issuer on the secondary market lead to a temporary reduction of the Cash Position and to a temporary relative increase of all other Basket Components. The temporary increase/decrease of the Cash Position due to secondary market activities in the Product and the subsequently temporary relative decrease/increase of all other Basket Components may have, due to unfavorable market movements, an adverse impact on the value of the Product.

If the available Cash Position is not sufficient to enable repurchases of Products by the Issuer on the secondary market, the Investment Advisor will inform the Issuer which Basket Component(s) is/are to be reduced. If the Investment Advisor cannot be reached in time or if he does not place an order with the Issuer, the Issuer has the right, at its discretion, to reduce one or more Basket Component(s) or to refuse to execute the secondary market sales transactions.

Issuer Estimated Value ("IEV") / Total Expense Ratio ("TER") / Distribution Fees

IEV and TER are calculated by the Issuer or any third party appointed by the Issuer, as applicable, on the Initial Fixing Date, or at the start of the Subscription Period and will not be updated during the term of the Product.

TER corresponds to the difference between the Issue Price of the Product and the IEV and is comprised of the expected issuer margin and the Distribution Fee, if any and contains also the Annual Fee. The Rebalancing Fee is not part of the TER. The Issuer margin covers amongst others the costs for the structuring, market making and settlement of the Product as well as the expected issuer revenues. The Issue Price (including IEV and TER) of the Product is calculated based on internal pricing models of the Issuer.

The Issuer may sell this Product to financial intermediaries and other financial institutions at a discount to the Issue Price or reimburse a certain amount of the Issue Price to them ("Distribution Fees"). Distribution Fees, if any, are disclosed in section 1 of this document and reflect the maximum amount a financial intermediary or financial institution may receive from the Issuer; the actual amount may be lower. Detailed information is available on request.
