On the Redemption Date the Investor will receive a Cash Settlement as further described under "Redemption". Index Description

The Underlying is a dynamic, actively managed index (the "**Index**") which is discretionarily managed by the Index Sponsor and calculated by the Index Calculation Agent. The components of the Underlying (the "**Components**") may – subject to Index Calculation Agent's veto right – be rebalanced by the Index Sponsor on a regular basis. The Index Sponsor determines and is responsible for the composition of the Index and may add, replace or remove Components in accordance with a set of predefined rules set out in the Index Rule Book "Adaptivv Downside Control Bitcoin ETF Index", Version ID I3G98, dated 19/01/2024 (the "**Index Rule Book**").

Objective: The objective of the Index is to provide an improved risk/return profile compared to a passive investment in Bitcoin ETF's and to protect against major drawdowns during severe market crises.

The Index dynamically allocates – using a rule-based methodology – between the Bitcoin ETF's and a money market instrument using variance-weighted trend indicators adjusted for regime shifts. Conceptually, the allocation model weights on the assumption that Bitcoin can undergo sudden changes (regime shifts) in its price dynamic.

Bitcoin exposure is represented through several ETFs and the weighting of each Bitcoin ETF is limited to a maximum of 30% on each rebalancing date.

The Index Sponsor aims to rebalance the components of the Index on a weekly basis (ad-hoc rebalancings e.g. in case of news flow etc. are possible).

The Index Sponsor is exclusively responsible for compliance of the Index at all times with the investment objective.

Universe: The Index universe consists of eligible Components and may include Cash Instruments, ETFs, as determined by the Index Sponsor and subject to the restrictions defined in the Index Rule Book.

Distributions: Net distributions with respect to Components (after deduction of any expenses and taxes) will lead to an adjustment of the Index (as specified in the Index Rule Book).

The Index represents a hypothetical portfolio. There is no obligation on the Index Calculation Agent, the Issuer or any other party to purchase and/or hold any Components of the Index and there is no actual portfolio of assets to which any person is entitled or in which any person has any ownership interest. The Index is merely comprised of Components, the performance of which will be used as a

* levels are expressed in percentage of the Initial Fixing Level

reference point for the purposes of calculating the value of the Index. The Issuer shall be free to choose how to invest or further proceed with any proceeds of the issuance of any of the Products.

References to any rebalancing of the Index or addition, adjustment, substitution, replacement or removal of Components should not be construed as imposing an obligation on the Issuer, the Index Calculation Agent or any person actually to acquire or dispose of any securities, investments, assets or other property but are references to the change in, and relate solely to the calculation of, the value of the Index, which is relevant for the determination of any amount payable in respect of the Product.

Upon request, the Index Rule Book and the latest composition of the Index are available free of charge from the Lead Manager (Leonteq Securities AG, Europaallee 39, 8004 Zurich, Switzerland or termsheet@leonteq.com).

Redemption

The Investor is entitled to receive from the Issuer, subject to an Extraordinary Termination, on the Redemption Date per Product a Cash Settlement in the Settlement Currency corresponding to the value of the Underlying on the Final Fixing Date adjusted by the Units, the Management Fee, the Performance Fee, the Calculation Agent Fee and, as the case may be, the FX Rate. This amount equals $Value_t$ on the Final Fixing Date, where $Value_t$ is calculated according to the following formula and reasonably determined by the Calculation Agent.

$$Value_t = FX Rate_t \times Units_t \times Index Value_t - AMF_t - APF_t - ACAF_t$$

Index Value_t	Means the official closing price of the Underlying on Scheduled Trading Day t as published by the Index Calculation Agent, and as reasonable determined by the Calculation Agent.
FX Rate_t	Means the prevailing exchange rate on the Scheduled Trading Day t as reasonably determined by the Calculation Agent. The exchange rate is expressed as units of the Settlement Currency per one unit of currency of the Underlying (if both currencies are identical then $FX Rate_t$ is equal to 1.0).
Units_t	Means the notional units of the Underlying per Product on Scheduled Trading Day t. Provided Scheduled Trading Day t is not an Observation Date: $Units_t = Units_{t-1}$ If Scheduled Trading Day t is an Observation Date: $Units_t = Units_{t-1} - (AMF_t + APF_t + ACAF_t) / (Index Value_{t-1} \times FX Rate_t)$ Where $Index Value_{t-1}$ means $Index Value_t$ of the Underlying on Scheduled Trading Day t, adjusted by any costs incurred by the Issuer or a hedging party thereof for unwinding risk reducing hedging transactions relating to the Issuer's obligations under the Product, as reasonable determined by the Calculation Agent. $Units_t$ are rounded in accordance with the Rounding Convention. Following the adjustment of $Units_t$ by AMF_t , AMF_t is reset to zero. Following the adjustment of $Units_t$ by $ACAF_t$, $ACAF_t$ is reset to zero. Following the adjustment of $Units_t$ by APF_t , APF_t is reset to zero.
AMF_t	Means the accrued management fees on Scheduled Trading Day t and is determined by the Calculation Agent as follows: $AMF_t = AMF_{t-1} + Value_{t-1} \times MF \times DayCount_t$ and $AMF_0 = 0.00$
ACAF_t	Means the accrued calculation agent fees on Scheduled Trading Day t and is determined by the Calculation Agent as follows: $ACAF_t = ACAF_{t-1} + Value_{t-1} \times CAF \times DayCount_t$ and $ACAF_0 = 0.00$
Day Count_t	Means the actual number of calendar days between (and including) Scheduled Trading Day t-1 to (and excluding) the current Scheduled Trading Day t divided by 360.
Rounding Convention	Numbers are rounded down to five (5) decimal places.
APF_t	Means the accrued performance fees on Scheduled Trading Day t and is determined by the Calculation Agent as follows: $APF_t = APF_{t-1} + PF \times \text{Max}(0; Value_{t-1} - Watermark_{t-1})$ and $Watermark_t = Watermark_{t-1} = Value_t$ and $APF_0 = 0.00$
Watermark_{t-1}	Means the maximum of $Value_t$ on any Scheduled Trading Day since the Initial Fixing Date up to (and including) Scheduled Trading Day t-2.
Scheduled Trading Day t	Means any calendar day on which the Index Calculation Agent is scheduled to publish a value for the Underlying. The Initial Fixing Date corresponds to Scheduled Trading Day 0 and for any subsequent Scheduled Trading Day variable t is incremented by one (1.0).
Initial Fixing Level (Index Value₀)	Means the official closing price of the Underlying on the Initial Fixing Date as determined by the Calculation Agent.
Issuer's Termination Right	The Issuer has the right to call all Products for early redemption (the " Termination Right ") at any time with a 15 Business Days (prior to the respective Final Fixing Date) notice by announcement (the " Termination Announcement ") on the Lead Manager's website, all in accordance with the General Terms and Conditions of the Programme. The Termination Announcement will specify the Final Fixing Date and the respective Redemption Date. Following the announcement, the Products will be redeemed on the Redemption Date for a value equal to the $Value_t$ on the Final Fixing Date as determined by the Calculation Agent.
Investor's Termination Right	Each Investor has an annual right, on 19/01 and for the first time on 19/01/2025, to call the Products for redemption (such day the Investor's Termination Right becomes effective being the Final Fixing Date, as defined herein) by delivering a duly completed and signed Redemption Notice to the Authorized Participant in accordance with the General Terms and Conditions of the Programme (the Redemption Notice to be received by the Authorized Participant no later than 12:00 am CET on the 15th Business Day preceding the respective Final Fixing Date). Thereafter, the Products will be redeemed on the Redemption Date for a value equal to the $Value_t$ on the Final Fixing Date as determined by the Calculation Agent.

Information about TCM-Collateralisation

Triparty Collateral Management Products ("**TCM Products**") are products with a reduced issuer risk. This protection is provided by means of a collateral pledge. Investors thus profit from increased protection on the invested capital.

The Collateral Provider has entered into a security agreement (as amended or replaced from time to time, the "**TCM Security Agreement**") and TCM Products are collateralised in accordance with the terms of the TCM Security Agreement. The Collateral Provider will provide collateral to secure the value of TCM Products, whereby such collateral can consist among others of the securities that are the direct or indirect underlyings of TCM Products.

The legal position of the Investors and of all involved parties in relation to the collateralisation of TCM Products is determined by the provisions of the TCM Security Agreement. The Issuer shall, upon request, provide the TCM Security Agreement to the Investors free of charge. A copy of the TCM Security Agreement may be obtained from the Lead Manager at Europaallee 39, 8004 Zurich (Switzerland), or via telephone (+41 58 800 1111*), fax (+41-(0)58-8001010) or email (termsheet@leonteq.com). Please note that all calls made to numbers marked with an asterisk (*) are recorded. By calling such number, your consent to the recording is deemed given.

More detailed information regarding TCM collateralisation can also be found in the Programme.

The costs with respect to the collateralisation of TCM Products as well as the borrowing costs of the products' collateral may be taken into account for the pricing of TCM Products and may therefore be borne by the Investors, as the case may be.

The payment to the Investors in case of a so-called Realisation Event may be delayed for factual or legal reasons.

To the extent the calculation of the current value of a TCM Product, as published daily by the Collateral Provider on SIX Financial Information, proves to be incorrect, the collateralisation of the TCM Product may be insufficient.

This TCM Product does not constitute a collective investment scheme pursuant to the Federal Act on Collective Investment Schemes (CISA) and does not require authorisation or supervision by the Swiss Financial Market Supervisory Authority FINMA.
