1. Product Description

LUKB Actively Managed Tracker Certificates offer Investors the opportunity to replicate the price movement of the Basket and thus to participate in its development. The risk/return profile of this Product is comparable to the risk/return profile of the Basket. The Basket consists of several components (the "Basket Components") and represents the Underlying of this Product. The Basket is **dynamic** and managed **discretionary** by the Investment Advisor during the lifetime of the Product. The Investment Advisor composes the Basket in line with the Investment Strategy at his own discretion and can amend the composition at any time. Thus, the performance of the Basket depends on the Investment Strategy pursued by the Investment Advisor and its implementation. There are no distributions to the Investor. The net dividends, net coupons resp. net distributions distributed by the Basket Components are reinvested in the respective Basket Components.

Investment Strategy

The technology sector has established itself as one of the most important drivers of global growth in recent years. In an increasingly digitalised world, technological innovations are of crucial importance in almost all sectors. Investments are made in future technologies such as battery technology, biotechnology, blockchain, cloud, cyber security, digitalisation, technological innovation, fintech, semiconductors, software, artificial intelligence (AI), meta-universe, online trading and robotics. The investment focus is on leading global companies whose market position and prospects within an industry are outstanding.

The Investment Strategy does not involve leverage and is implemented in accordance with the Investment Guidelines. These guidelines provide for a maximum investment degree of 100% and a weighting of the individual basket components between a minimum of 0% and a maximum of 100%. In addition, the number of basket components is between a minimum of 10 and a maximum of 80. The basket contains a cash position. The underlyings are selected based on the qualified market assessment of the investment advisor.

Further information on the Investment Strategy, the Investment Guidelines and the Investment Restrictions - if available - can be obtained free of charge from the Issuer: Luzerner Kantonalbank AG Structured Products, Pilatusstrasse 12, 6003 Lucerne, Email: structuredproducts@lukb.ch.

Underlying Universe

Equity securities such as shares, participation certificates, profit-sharing certificates and Exchange Traded Funds (ETFs) that are listed or admitted to trading on SIX Swiss Exchange or on a foreign securities exchange with equivalent regulation are permitted as underlying instruments. The underlyings are selected by the Investment Advisor as part of the Investment Strategy implementation. In addition to the above underlyings, a Cash Position is used as a Basket Component and is included in the Basket. The Cash Position is in the currency of the product and does not bear interest, however the Issuer reserves the right to charge negative interest rates in the future. The cumulative share of the Cash Position and the debt securities with interest component may not exceed 50% of the product value [on an annual average].

At the discretion of the Investment Advisor, the FX risk can be hedged against its certificate currency with automated FX swaps on a daily rollover basis (Spot/Next). Whether and which currencies can be hedged is determined in exchange with the Issuer. Any PnL derived from this hedging activity will be considered in the determination of the Redemption Amount.

Implementation of the Investment Strategy

The Investment Advisor is solely responsible for the implementation and compliance of the Investment Strategy and decides solely on the composition and reallocation (rebalancing) of the Basket. The Issuer has no obligation to monitor

this, but reserves the right to refuse to accept a new Basket Component by the Investment Advisor without giving any reasons.

The fixing period is at the discretion of the Issuer and is primarily based on the liquidity of the Basket Components; if one or more Basket Components have limited liquidity, the fixing period can be extended.
