LUKB Actively Managed Tracker Certificates offer Investors the opportunity to replicate the price movement of the Basket and thus to participate in its development. The risk/return profile of this Product is comparable to the risk/return profile of the Basket. The Basket consists of several components (the "Basket Components") and represents the Underlying of this Product. The Basket is **dynamic** and managed **discretionary** by the Investment Advisor during the lifetime of the Product. The Investment Advisor composes the Basket in line with the Investment Strategy at his own discretion and can amend the composition at any time. Thus, the performance of the Basket depends on the Investment Strategy pursued by the Investment Advisor and its implementation. There are no distributions to the Investor. The net dividends, net coupons resp. net distributions distributed by the Basket Components are reinvested in the respective Basket Components.

Investment Strategy

The investment strategy of European Equity Focus aims to invest in stable and successful European companies. The focus is on companies with a solid financial position, robust business model and long-term growth potential. The aim is to achieve broad diversification through targeted investments in various sectors, with a particular focus on economically resilient industries. Stocks are selected using the Investment Advisor's "ORBIS" stock selection tool, which includes quantitative and algorithmic analyses. In addition to a qualitative assessment of a company's business model, a quantitative selection model is used to optimize the stock selection. Using algorithms and artificial intelligence, the model analyzes potential and existing stocks based on quantitative factors in the areas of quality, trend, risk and valuation (value). The focus in stock selection is on the three value models: "Alpha Potential", "Anti-Cyclical" and "Earnings Cycle". In addition, macroeconomic trends and regulatory developments within Europe are taken into account in order to manage opportunities and risks in the best possible way. The underlying securities and sectors are selected on the basis of the Investment Advisor's well-founded market assessment and monitored on an ongoing basis. The investment strategy does not include any leverage and is implemented in accordance with the investment guidelines. These provide for a maximum investment level of 100% and a weighting of the individual basket components between a minimum of 0% and a maximum of 100%. In addition, the number of basket components is between a minimum of 10 and a maximum of 40. The basket may include a cash position.

Further information on the Investment Strategy, the Investment Guidelines and the Investment Restrictions - if available - can be obtained free of charge from the Issuer: Luzerner Kantonalbank AG Structured Products, Pilatusstrasse 12, 6003 Lucerne, Email: structuredproducts@lukb.ch.

Underlying Universe

The securities universe consists of European companies, which the investment advisor selects as part of the implementation of the investment strategy. Equity securities such as shares, participation certificates and profit-sharing certificates that are listed or admitted to trading on SIX Swiss Exchange or on a foreign securities exchange with equivalent regulation are permitted as underlying instruments. The underlyings are selected by the Investment Advisor as part of the Investment Strategy implementation. In addition to the above underlyings, a Cash Position is used as a Basket Component and is included in the Basket. The Cash Position is in the currency of the product. The Cash Position does not bear interest, however the Issuer reserves the right to charge negative interest rates in the future. The Cash Position may not exceed 50% of the product value. At the discretion of the Investment Advisor, the FX risk can be hedged against its certificate currency with automated FX swaps on a daily rollover basis (Spot/Next). Whether and which currencies can be hedged is determined in exchange with the Issuer. Any PnL derived from this hedging activity will be considered in the determination of the Redemption Amount.

Implementation of the Investment Strategy

The Investment Advisor is solely responsible for the implementation and compliance of the Investment Strategy and decides solely on the composition and reallocation (rebalancing) of the Basket. The Issuer has no obligation to monitor

this, but reserves the right to refuse to accept a new Basket Component by the Investment Advisor without giving any reasons.
