Tax Treatment Switzerland

| | |
|---------------------------|---|
| Swiss Transfer Stamp Duty | The product qualifies as a taxable security (bond). In principle secondary market transactions are subject to Swiss Stamp Duty. If shares are delivered to the investor at redemption, the delivery of the shares is in principle subject to the Swiss Stamp Duty. |
| Swiss Income Tax | For Swiss tax purposes this product is qualified as a combination of an option and a bond with the majority of the return consisting of coupon as opposed to discount or agio (non IUP). For private investors resident in Switzerland the interest component of the coupon and the increase of the bond floor (if any) are subject to income tax. The tax liability related to the increase of the bond floor crystallises at redemption and does not depend on the time of purchase. However, any gain derived from the option is considered as capital gain and is therefore for such investors not subject to income tax. If the product carries negative interest: If the product carries a negative interest at issuance, these investors can pursuant to the practice of the Swiss Federal Tax Administration neither set negative interest off against interest income nor deduct negative interest from other taxable income. |

Potential investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market investors may receive less than the capital invested.

In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for investors that are not paid by the Issuer or imposed by the Issuer.

Market Disruption risk

Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product Documentation.

Effects of structuring and product management

When the Product is issued or sold, several types of incidental costs, fees, commissions and profits are included in the purchase price of the Product. Such incidental costs and fees may include (i) issuance and securitisation costs; (ii) hedging costs and brokerage fees incurred by the Issuer in connection with the issuance of the Product; (iii) a profit priced into the Issue Price for the benefit of the Issuer; (iv) commissions paid internally from one department to another department (e.g. sales department) of the Issuer; (v) distribution fees to intermediaries, brokers or other distributors and financial advisors; (vi) other costs incurred by the Issuer in connection with the issuance of the Product (including, without limitation, costs for external legal and tax advice). Such costs reduce the value of the Product in the sense that a potential bid price will exclude such costs and therefore is likely to be lower than the Issue Price or offer price of the Product.

Withholding tax

Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). **Any payments due under this Product are net of such tax.** Please refer to the Product Documentation for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.

Accordingly, no Products may be offered, sold or made the subject of an invitation for subscription or purchase nor will the Product Documentation or any other related document or material be used in connection with any offer, sale or invitation to subscribe or purchase securities, whether directly or indirectly, to persons in the Kingdom of Bahrain, other than as marketing to accredited investors for an offer outside Bahrain.

The CBB has not reviewed, approved or registered the Product Documentation or related offering documents and it has not in any way considered the merits of the Products to be marketed for investment, whether in or outside the Kingdom of Bahrain. Therefore, the CBB assumes no responsibility for the accuracy and completeness of the statements and information contained in the Product Documentation and expressly disclaims any liability whatsoever for any loss howsoever arising from reliance upon the whole or any part of the content of the Product Documentation.

No offer of Products will be made to the public in the Kingdom of Bahrain and the Product Documentation must be read by the addressee only and must not be issued, passed to, or made available to the public generally.

Each Manager has represented and agreed, and each further distributor appointed will be required to represent and agree, that it has not offered or sold, and will not offer or sell any Products except as marketing to persons in Bahrain who are "accredited investors" for an offer outside Bahrain. For this purpose, an accredited investor means:

- (a) an individual holding financial assets (either singly or jointly with a spouse) of 1,000,000 U.S. Dollars or more, excluding that person's principal place of residence;
- (b) a company, a partnership, a trust or other commercial undertaking, which has financial assets available for investment of not less than 1,000,000 U.S. Dollars; or
- (c) a government, supranational organisation, central bank or other national monetary authority or a state organisation whose main activity is to invest in financial instruments (such as a state pension fund).
