Key elements of the product

Long Mini-Future enable a overproportionate participation in the price development of the Underlying corresponding to the Leverage. Long Mini-Future benefit from rising prices of the Underlying. These Long Mini-Future have no fixed maturity, but have a Stop-Loss Level that is adjusted daily or periodically. Upon reaching the Stop-Loss Level the Long Mini-Future expires immediately and any realisable residual value is repaid to the investor. A daily interest rate consisting of a Money Market Interest Rate and a Financing Spread is offset against the leveraged capital in the amount of the Financing Level provided by the Issuer. Any investment income from the Underlying/the components of the Underlying will be deducted from the Financing Level.
