1. Product Description

LUKB Actively Managed Tracker Certificates offer Investors the opportunity to replicate the price movement of the Basket and thus to participate in its development. The risk/return profile of this Product is comparable to the risk/return profile of the Basket. The Basket consists of several components (the "Basket Components") and represents the Underlying of this Product. The Basket is **dynamic** and managed **discretionary** by the Investment Advisor during the lifetime of the Product. The Investment Advisor composes the Basket in line with the Investment Strategy at his own discretion and can amend the composition at any time. Thus, the performance of the Basket depends on the Investment Strategy pursued by the Investment Advisor and its implementation. There are no distributions to the Investor. The net dividends, net coupons resp. net distributions distributed by the Basket Components are reinvested in the respective Basket Components.
