## 1. Product specific conditions and product description

Leverage / Warrant (2100, acc. Swiss Structured Products Association)

**This product does not constitute a collective investment scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA) and it is not subject to authorisation or supervision by FINMA. The issuer risk is borne by investors.**

ZKB Call Warrants enable the investor to benefit both from a rising Underlying and from the rising volatility of the Underlying. The investor has the right (not the obligation) to demand a cash settlement amount equal to the difference between the price of the Underlying on the Expiry Date (european) and the Exercise Price (taking into account the Ratio). The product is therefore suitable for investors with a high risk tolerance who are willing to invest the Issue or purchase Price to speculate on the future performance of the Underlying or to hedge certain positions against market fluctuations. The potential return from the investment amount is overproportionately higher than direct investment in the Underlying due to the Leverage effect.

| <b>Profit and Loss Expectations at<br/>Maturity</b>  | <p><b>2. Profit and Loss Expectations at Maturity</b></p> <p>The product offers the opportunity to disproportionately benefit from a positive performance of the Underlying due to the leverage effect. The profit prospects for the product are fundamentally unlimited. A potential profit consists of the positive difference between the achieved selling price or redemption amount and the Issue Price or purchase price. The amount of the redemption payment depends – taking the ratio into account – on the extent to which the closing price exceeds the Exercise Price on the Exercise Date and may be influenced by exchange rate variations.</p> <p>The product has a fixed term. The loss potential is limited to the invested capital, which corresponds to a total loss. The risk of this investment is significantly greater than that of a direct investment due to the leverage effect.</p>   |
| <b>Issuer Risk</b>                                   | <p><b>3. Material Risks for Investors</b></p> <p>Obligations under these products constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this product.</p>  |
| <b>Specific product risks</b>                        | <p>ZKB Call Warrants involve the risk of losing the entire initial capital (purchase price). They are intended only for experienced investors who understand and are capable of bearing the associated risks. If the products are denominated in a currency other than the Underlying, the investor bears any exchange rate risks between the product Currency and the currency of the Underlying.</p> <p>The products do not generate ongoing income. If there is no increase in the price of the Underlying, the product generally loses value. The value of the product can also decrease if the price of the Underlying remains unchanged but supply and demand develop unfavorably. Therefore, the maximum risk is the loss of the invested capital, which corresponds to a total loss. The risk of this investment is significantly greater than that of a direct investment in the Underlying, not only due to the leverage effect, but also due to the risk of a Knock-Out Event occurring.</p> |
| <b>Modifications</b>                                 | <p><b>4. Additional Terms</b></p> <p>If an extraordinary event as described in the Base Prospectus occurs in relation to an Underlying/Component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the products or to calculate the value of the products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these products at its own discretion in such way, that the economic value of the products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the products prior to the occurrence of the extraordinary event.</p>  |
| <b>Change of Obligor</b>                             | <p>The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual products or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned products which the previous Issuer owed in respect of these products, (ii) the Zürcher Kantonalbank enters into a Keep-Well Agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of products and the assumption of the obligations under the assigned products.</p>  |
| <b>Market Disruptions<br/>Prudential Supervision</b> | <p>Compare specific provisions in the Base Prospectus.</p> <p>As a bank within the meaning of the Swiss Federal Act on Banks and Savings Banks (BankG; SR 952.0) and a securities firm within the meaning of the Swiss Federal Act on Financial Institutions (FinIAG; SR 954.1), Zürcher Kantonalbank is subject to the prudential supervision of FINMA, Laupenstrasse 27, CH-3003 Bern, <a href="https://www.finma.ch">https://www.finma.ch</a>.</p>   |
| <b>Recording of Telephone<br/>Conversations</b>      | <p>Investors are reminded, that telephone conversations with trading or sales units of the Zürcher Kantonalbank are recorded. Investors, who have telephone conversations with these units consent tacitly to the recording.</p>  |

information contained in this document does not constitute investment advice but is intended solely as a product description. An investment decision should in any case be made on the basis of these Final Terms and the Base Prospectus. Particularly, before entering into a transaction, the investor should, if necessary with the assistance of an advisor, examine the conditions for investment in the product in consideration of his personal situation with regard to legal, regulatory, tax and other consequences.
