Information on Levels

Underlying	Initial Fixing Value	Cap Level	Ratio
Holcim Ltd	CHF 71.70	CHF 55.8185 (77.85% of the Initial Fixing Value)	Denomination * FX / Cap Level

FX = Exchange rate on Final Fixing Date

The relevant exchange rate is defined as an amount of the currency of the Underlying per 1 unit of the product Currency. The exchange rate on the Final Fixing Date corresponds to the WM/Reuters fixing at 16:00 London Time (Reuters: "WMRSPOT") resp. the cross rate Calculated from the fixing. If the fixing price is not available, a price determined by the Calculation agent is applied, which is based on the interbank spot rates at 16:00 London Time.

Local taxes, transactions fees and foreign commissions are, if applicable, included in the Initial Fixing Value of each component and are thus borne by the holders of the structured product. This applies particularly, though not exclusively, when exercising rights associated with the structured product and/or a Rebalancing.

Coupon 5.50% p.a. per Denomination EUR 100,000
Interest part: 1.2553%; Premium part: 1.4794%
The Coupon is paid out on the respective Coupon Date regardless of the performance of the Underlying.

Coupon Date(s)/ Coupon Payment(s)	Coupon Date _t *	Coupon Payment _t
t = 1	23/02/2027	2.734722%

* modified following business day convention

The respective coupon payment is calculated as the product of the Denomination and the specified Coupon for the corresponding Coupon Date_t. In this context, the Issuer may, at its sole discretion, deviate from the Coupon Calculation Method, particularly in the case of coupon periods of unequal length.

Entitlement to coupon payment The entitlement to the coupon arises from the ownership of the product, which is determined by the applicable provisions of the respective Clearing Agent and generally corresponds to holding the product on the banking business day ("**Record-Date**") prior to the respective coupon date. The "**Coupon Ex-Date**" refers to the first trading day on which the product is traded ex-interest; it is usually set two banking business days before the coupon date. Investors must therefore have purchased (or not sold) the product no later than one banking business day before the respective Coupon Ex-Date in order to be entitled to the coupon.

Key elements of the product	The product pays out coupons on defined dates during the term. This product is a combined investment instrument that essentially consists of a fixed income security and the sale of a put option. This allows the investor to benefit from the current volatility of the Underlying. An above-average return is achieved when prices fall slightly, stagnate or rise slightly. If the Final Fixing Value of the Underlying is at or above the Cap Level, the investor receives a cash redemption in the amount of the Denomination. If the Final Fixing Value of the Underlying is below the Cap Level, the investor will receive a physical delivery of a number of Underlyings. The calculation of the Redemption is independent of any changes in foreign exchange rates between the Currency of the product and the currency of the Underlying (Quanto Style).
Tax aspects	The product is considered as transparent and has predominant one-off interest (IUP). The option premium part qualifies as capital gain and is not subject to Swiss income tax for private investors with Swiss tax domicile. The interest payment is subject to income tax and is determined in compliance with the 'modifizierte Differenzbesteuerung' tax rule based on the EStV Bondfloor Pricing method. The applicable daily exchange rate for foreign currency translation purposes may be an important factor. The Swiss withholding tax is levied. In the case of physical delivery of the Underlying at maturity, the federal securities transfer stamp is levied on the basis of the Cap Level. The Federal securities transfer stamp tax is not levied on secondary market transactions. The product may be subject to further withholding taxes or duties, in particular under the rules of FATCA or Sect. 871(m) U.S. Tax Code or foreign financial transaction taxes. All payments from this product are made after deduction of any withholding taxes and levies. 2. Profit and Loss Expectations

Profit and Loss Expectations at Maturity	ZKB Reverse Convertible Defensive
---	-----------------------------------

Value Underlying	Percent	Redemption	Performance in %
CHF 39.44	-45%	EUR 73383.41	-26.62%
CHF 50.19	-30%	EUR 92651.23	-7.35%
CHF 60.95	-15%	EUR 102734.72	2.73%
CHF 71.7	0%	EUR 102734.72	2.73%
CHF 82.46	15%	EUR 102734.72	2.73%
CHF 93.21	30%	EUR 102734.72	2.73%
CHF 103.97	45%	EUR 102734.72	2.73%

If the Final Fixing Value of the Underlying is at or above the Cap Level, the performance of the product is always given by the Coupons paid out during the term. However, if the Final Fixing Value of the Underlying is below the Cap Level, the investor will receive a physical delivery of a number of Underlyings as defined in Ratio. Therefore, the investor may suffer a partial or total loss. The acquisition price of the delivered Underlyings is 77.85% of the Initial Fixing Value (Cap Level), which means that the performance of the product is less negative than the performance of the Underlying. This negative performance is reduced by the guaranteed Coupons paid out during the term.

The table above applies at maturity and cannot be used as a price indication by the Issuer for the present Product during its term. During the term of the Product, additional risk factors arise that have a significant impact on the value of the Product. The price quoted on the secondary market may therefore deviate substantially from the table above. Currency risks between the Underlying and the Product are not considered in the table.

3. Material Risks for Investors

Issuer Risk	Obligations under these products constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this product.
Specific product risks	Structured products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these structured products and are capable of bearing the economic risks. The loss potential of an investment in ZKB Reverse Convertible Defensive in the case of a title delivery is limited to the difference between the purchase price of the product and the cumulative value of the number of Underlyings as defined in Ratio. The Coupon, which is paid out in any case, reduces the loss of the product compared to a direct investment in the Underlying. The product is denominated in EUR. If the investor's reference currency differs from the EUR, the investor bears the risk between the EUR and his reference currency.

4. Additional Terms

Modifications	If an extraordinary event as described in the Base Prospectus occurs in relation to an Underlying/Component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the products or to calculate the value of the products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these
----------------------	--
