Product Description

These products are characterised by one or several guaranteed Coupons, several Barriers as well as by a – albeit only conditional – redemption at the Nominal Value. The Issuer has the right for Early Redemption as further described in "Early Redemption". Provided that no Early Redemption has taken place, the redemption at the end of the term is determined on the basis of the performance and the closing prices of the respective Underlyings: A redemption at the Nominal Value is guaranteed as long as no Barrier Event has occurred. If a Barrier Event has occurred but at Final Fixing all Underlyings are again higher than or equal to the respective Strike Prices, the Nominal Value is repaid. If, however, a Barrier Event has occurred and at Final Fixing at least one of the Underlyings closes lower than the corresponding Strike Price, the investor receives the delivery of the Underlying with the poorest performance or a cash compensation, corresponding to the closing price of this Underlying (for details see "Redemption/Delivery").

Tax treatment in Switzerland

Swiss Income Tax	This product does not qualify for predominantly one-off interest payments (Non-IUP). The coupons consist of two components: the premium component, which in Switzerland qualifies as a tax-free capital gain, and the interest component, which in Switzerland is subject to direct federal tax (maturity principle).

Swiss Turnover Tax	Secondary market transactions are not subject to the Swiss turnover tax. If delivery of the underlying is stipulated, the swiss turnover tax may, however, be imposed.
General Information	Transactions and payments relating to this product may be subject to further (foreign) transaction taxes, duties and/or withholding taxes, in particular a withholding tax pursuant to the Section 871(m) of the US Internal Revenue Code. All payments from this product will occur with any applicable taxes and duties deducted. If delivery of the underlying is stipulated, foreign taxes and duties have to be assumed by the investors. The information on taxation is for general information purposes only and do not constitute tax, legal or financial advice. They are based on the Issuer's understanding of the taxation of these products at the time of issuance, considering the applicable law as well as the prevailing practice of the Swiss Federal Tax Administration in Switzerland. The Issuer accepts no responsibility or liability for the accuracy, completeness, or currency of this information. The legal basis and the practice of the tax authorities may change at any time, and retroactive changes cannot be excluded. (Prospective) investors are therefore advised to consult their own tax advisors regarding the tax consequences of the purchase, holding, sale, redemption, or other disposal of this product, taking into account their individual circumstances and the applicable jurisdictions.

Prospects of Profit and Losses

Any possible gain results from the guaranteed fixed Coupons. Nevertheless, there is an upper limit to the gain, as the maximum payment is the Nominal Value plus the coupons.
The Issuer has the right to terminate the product prematurely (for details see "Early Redemption").
These products have only conditional repayment at the Nominal Value defined by the individual Barriers: If a Barrier Event has occurred, the right of a guaranteed repayment at the Nominal Value ceases to apply immediately. Investors should be aware that this can happen during the relevant Barrier Monitoring (period of time or point(s) of time). Accordingly, the risks are considerable; given upwardly limited chances of gains, they correspond largely to the risks of a direct investment in the Underlying with the poorest performance. The lower the closing price of the Underlying

with the poorest performance after falling below its Strike Price, the greater the losses sustained. Apart from the Coupon Payments, in extreme cases, i.e. when the price of the Underlying is equal to zero (0), the maximum loss can lead to a loss of all the capital invested.
Even if the performance of the Underlyings is positive and no Barrier Event has occurred, the price of the product during the term can be considerably below the Issue Price. Potential investors should bear in mind that price changes to the Underlyings, as well as other influencing factors, may have a negative effect on the value of products.

Significant Risks for Investors

Currency risks

If the Underlying or Underlyings is/are denominated in a currency other than the product's Reference Currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the Underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks

The general market performance of Securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the product.

Disruption risks

There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the products. Such occurrences can have an effect on the time of redemption and/or on the value of the products.

In the event of trading restrictions, sanctions and similar occurrences, the Issuer is entitled, for the purpose of calculating the value of the product, to include at its own discretion the Underlying instruments at their most recently traded price, at a fair value to be established at its sole discretion or indeed as worthless, and/or additionally to suspend pricing in the product or liquidate the product prematurely.

Secondary market risks

Under normal market conditions, the Issuer or the Lead Manager intend to post bid- and ask-prices on a regular basis. However, neither the Issuer nor the Lead Manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the products on a specific date or at a specific price.

Issuer risk

The value of Structured Products may depend not only on the performance of the Underlying(s), but also on the creditworthiness of the Issuer, which may change during the term of the Structured Product. The investor is exposed to the risk of default of the Issuer. For further information on the rating of Bank Vontobel AG, please see the Base Prospectus.

Risks relating to potential conflicts of interest

There may be conflicts of interest at the Vontobel Group companies that could have a negative impact on the value of the Structured Products. For example, Vontobel Group companies may enter into or participate in trading and hedging transactions relating to the Underlying. They may also perform other functions relating to the Structured Products (e.g. as Calculation Agent, Index Sponsor and/or Market Maker) which enable them to determine the composition of the Underlying or calculate its value. Vontobel Group companies may also receive non-public information relating to the Underlying. It should also be noted that the payment of distribution fees and other commissions to financial intermediaries could result in conflicts of interest to the detriment of the investor, as this could create an incentive for the financial intermediary to distribute products with a higher commission preferentially to its clients. As market maker, Vontobel Group companies can determine the price of Structured Products themselves to a large extent and determine it on the basis of various factors and earnings considerations.
Please also note the further, detailed description of potential conflicts of interest and their impact on the value of the Structured Products as contained in the Base Prospectus.
