1. Product Description

LUKB Actively Managed Tracker Certificates offer Investors the opportunity to replicate the price movement of the Basket and thus to participate in its development. The risk/return profile of this Product is comparable to the risk/return profile of the Basket. The Basket consists of several components (the "Basket Components") and represents the Underlying of this Product. The Basket is **dynamic** and managed **discretionary** by the Investment Advisor during the lifetime of the Product. The Investment Advisor composes the Basket in line with the Investment Strategy at his own discretion and can amend the composition at any time. Thus, the performance of the Basket depends on the Investment Strategy pursued by the Investment Advisor and its implementation. This Product provides variable annual payments as compensation for the sum of the proportional net dividends, net coupons resp. net distributions paid by the Basket Components.

Investment Strategy

The "Swiss Lifetime Income Portfolio" invests primarily in Swiss stocks listed on the SIX Swiss Exchange from established companies with a sustainable dividend policy, solid balance sheet quality, and sufficient liquidity in the options market. The strategy aims to generate additional returns through dividends and premium income from option writing (option strategies), in addition to participating in the price performance of the selected stocks. The underlying securities are selected using a fundamental value approach with a long-term investment horizon. Quantitative and technical analysis criteria may also be incorporated into the selection process. The Basket is diversified across sectors and includes both cyclical and defensive sectors. Investments are made exclusively in Swiss equities with the CHF as the reference currency.

The product aims for an annual compensation payment of at least 4.00% p.a. of the issue price. The investment advisor may, at its discretion, set higher compensation payments. Experience shows that the strategy can realize its full potential particularly over an investment horizon of at least five years. However, the product is generally tradable and redeemable on any trading day.

The composition of the basket is determined dynamically and at the discretion of the Investment Advisor. Adjustments to the weightings and the individual Basket Components may be made at any time.

The Investment Strategy does not involve leverage and is implemented in accordance with the Investment Guidelines. These guidelines provide for a maximum investment degree of 100% and a weighting of the individual Basket Components between a minimum of 0% and a maximum of 100%. In addition, the number of Basket Components is between a minimum of 5 and a maximum of 20, but is usually around 10 Components, apart during the phase of investment and disinvestment. The Basket contains a Cash Position.

The underlyings are selected based on the qualified market assessment of the investment advisor.

Further information on the Investment Strategy, the Investment Guidelines and the Investment Restrictions - if available - can be obtained free of charge from the Issuer: Luzerner Kantonalbank AG Structured Products, Pilatusstrasse 12, 6003 Lucerne, Email: structuredproducts@lukb.ch.

Underlying Universe

Equity securities such as shares, participation certificates and profit-sharing certificates that are listed or admitted to trading on SIX Swiss Exchange or on a foreign securities exchange with equivalent regulation are permitted as underlying instruments.

In addition to short positions such as covered calls or puts on Swiss stocks, long positions in put options on Swiss stocks or stock indices can also be used for hedging purposes. Exchange-traded structured products are also permitted, provided the Investment Advisor determines that they are consistent with the investment strategy.

The underlyings are selected by the Investment Advisor as part of the Investment Strategy implementation.

In addition to the above underlyings, a Cash Position is used as a Basket Component and is included in the Basket. The Cash Position is in the currency of the product. The Cash Position does not bear interest, however the Issuer reserves the right to charge negative interest rates in the future. The cumulative share of the Cash Position and the debt securities with interest component may not exceed 50% of the product value on an annual average.

Implementation of the Investment Strategy

The Investment Advisor is solely responsible for the implementation and compliance of the Investment Strategy and decides solely on the composition and reallocation (rebalancing) of the Basket. The Issuer has no obligation to monitor this, but reserves the right to refuse to accept a new Basket Component by the Investment Advisor without giving any reasons.

**Compensation Payment Amounts /
Payment Decision Dates / Payment
Dates**

Each Product gives the Investor the right to receive on the Payment Dates the Compensation Payment Amounts: Compensation Payment Amounts: The sum of the proportional net dividend payments, net coupon payments resp. net distributions received by the Issuer in relation to any of the Basket Components, converted on the receive date into the Product Currency, if applicable. The Compensation Payment Amounts per Product are targeted to be minimum 4.00% per annum of the Issue Price (see "Investment Strategy"). However, the Compensation Payment Amounts are set at the discretion of the Investment Advisor. If the net dividend payments, net coupon payments resp. net distributions received by the Issuer are lower than the Compensation Payment Amount that the Investment Advisor has determined in respect of a particular Payment Date, the Investment Advisor will, in its sole discretion, reduce the exposure to certain Basket Components in order to generate the necessary cash amount. Such exposure reduction is implemented by a partial liquidation of Basket Components. The Compensation Payment Amounts will be determined by the Investment Advisor on the Payment Decision Dates and information about the Compensation Payment Amount (including the percentage amount of the Compensation Payment Amount not reflecting net dividend payments, net coupon payments resp. net distributions received by the Issuer) will be made available to Investors by the Issuer upon request.

Annual Payment Decision Date: 08.12. (modified following, for the first time in December 2026)

For further information on the Issuer Call, please refer to Section 5.1.13 of the General Terms and Conditions of the Base Prospectus.

Extraordinary right of termination of the Issuer

If changes in the Basket are planned or have already been made, which, in the sole opinion of the Issuer, are such that a continuation of the Products does not appear appropriate, the Issuer has the right to terminate at any time all outstanding Products for the purpose of early redemption without giving any reason on a freely determined Termination Date.

The corresponding notification must be published as soon as possible, stating the Termination Date.

Investor Put

Subject to prior notice by the Issuer, each Investor has the right to terminate its Products on a quarterly basis on March 01, June 01, September 01 and December 01 (modified following, for the first time in June 2027) ("Termination Date"). The Redemption Amount is determined by the Calculation Agent on the Termination Date. The Redemption is made 5 Business Days after the Termination Date. Market Disruption Event

If the Issuer and/or the Calculation Agent determines, in its reasonable discretion, that a day relevant for the determination of the price of one or some of the components of the Underlying (each an "Affected Component") is a Disrupted Day then the Issuer and/or the Calculation Agent shall determine the relevant price of the Affected Component in its reasonable discretion taking into account established market practice, including, but not limited to, using the most recently traded price or a fair value established at its sole discretion.

"Disrupted Day" means any Business Day on which any relevant exchange fails to open for trading during its regular trading session or on which an event has occurred that disrupts or impairs (as determined by the Issuer and/or Calculation Agent) the ability of market participants to effect transactions in or obtain market prices for, any components of the Underlying.

2. Prospects of Profits and Losses

Market Expectation

Investors in this Product expect an increase of the Basket Components respectively the Basket Level.

Maximum Return	The maximum return is theoretically unlimited.
Maximum Loss	Investors may lose all of the invested capital.

3. Significant Risks for the Investors

Potential Investors should ensure that they have sufficient knowledge to evaluate and understand the risks and benefits of an investment in this Product and to consider the suitability of this Product as an investment in light of their own circumstances, investment objectives, tax position and financial condition by consulting their own professional financial, accounting, legal and tax advisors. Thereafter Potential Investors should consider the additional risk factors in the Base Prospectus.

Issuer Risk	Investors in this Product bear the Issuer Risk. Potential Investors should therefore be aware that they are exposed to the credit risk of the Issuer. Hence, Investors bear the risk that the financial situation of the Issuer could deteriorate and the Issuer of the Product may become insolvent. In this case all forthcoming and thus not yet occurred compensation payments will also be affected by such insolvency and not be paid. The Product's value is therefore not only dependent on the performance of the Underlying(s) but also on the creditworthiness of the Issuer, which may change over the term of the Product. The Issuer Rating stated in this Final Terms may be subject to change.
Loss Potential	This Product provides no minimum repayment amount. Therefore, Potential Investors may lose all of the invested capital.
Capital Protection	This Product does not provide for a capital protection.
Risks compared to a direct Investment in the Underlying(s)	The risk potential is similar to a direct investment in the Underlying respectively in the Basket Components.
Early Termination and Cancellation	Under certain circumstances set forth in the General Terms and Conditions, the Issuer has the right to terminate and cancel this Product early and pay Investors the fair market value of this Product at the effective date of the Early Termination and Cancellation. Hence, Potential Investors should be aware that they may make a loss on their invested capital if the Products are terminated and cancelled early.
Secondary Market	<p>Even though the Issuer intends to make a market in these Products on a regular basis under normal market conditions, the Issuer is under no obligation with respect to Investors to provide any market in this Product at all, whereby any market making provisions of the stock exchange apply with regard to listed products. Potential Investors should note that there is no guarantee of a specific liquidity or a specific spread (difference between bid and ask prices) or any prices at all. Hence, Potential Investors should not rely on the possibility to buy or sell the Product in a specific point in time or to a specific price. By selling the Product in the secondary market Investors may receive less than the invested capital.</p> <p>In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with this Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.</p> <p>Sales of Products by the Issuer on the secondary market lead to a temporary increase of the Cash Position and to a temporary relative reduction of all other Basket Components. In contrast, repurchases of Products by the Issuer on the secondary market lead to a temporary reduction of the Cash Position and to a temporary relative increase of all other Basket Components. The temporary</p>

increase/decrease of the Cash Position due to secondary market activities in the Product and the subsequently temporary relative decrease/increase of all other Basket Components may have, due to unfavorable market movements, an adverse impact on the value of the Product.

If the available Cash Position is not sufficient to enable repurchases of Products by the Issuer on the secondary market, the Investment Advisor will inform the Issuer which Basket Component(s) is/are to be reduced. If the Investment Advisor cannot be reached in time or if he does not place an order with the Issuer, the Issuer has the right, at its discretion, to reduce one or more Basket Component(s) or to refuse to execute the secondary market sales transactions.

Market Disruption

Under certain circumstances set forth in the General Terms and Conditions, if the Issuer and/or Calculation Agent determines that a specified Market Disruption Event has occurred, any consequential adjustments in line with Combined Terms and Conditions may have an adverse effect on the value of this Product.

**Additional Market Disruption Event
- Temporary Suspension of NAV

FX Hedging

Exchange rate fluctuations of the individual basket components in relation to the product currency are not hedged. Changes in the exchange rates can have both a positive or negative impact on the product value.

**Implementation of the Investment
Strategy**

It is possible that the Investment Strategy will not achieve its goal, and the development of the Investment Strategy depends on the Investment Advisor. There is no guarantee that the Investment Advisor will successfully implement the Investment Strategy and that the Investment Strategy will develop positively.
