Switzerland

- This certificate is considered a transparent product whose yield consists predominantly of a one-time interest payment (IUP – intérêt unique predominant). Income from the bond component when the product is sold or redeemed (i.e., the difference between the amount of the zero coupon at purchase and at sale/redemption) constitutes taxable income for individuals whose tax domicile is in Switzerland and who hold these investments as part of their private assets.
- The discount rate is 0,00%, which amounts to a bond floor of 100,00% if the product is held until maturity. The final amount subject to income tax is calculated in CHF. Therefore if the base currency of the product is not in CHF, any change in the exchange rate between the issue date and the sale/redemption date of the product will affect how much income must be reported.
- The positive difference between the bondfloor at the redemption date and the Bondfloor at the issue date is subject to Swiss withholding tax on the redemption. If the base currency of the product is not in CHF, any change in the exchange rate between the issue date and the sale/redemption date of the product will affect how much income must be reported.
- The coupons paid are considered capital gains. Capital gains do not currently constitute taxable income for individuals whose tax domicile is in Switzerland and who hold this product as part of their private assets.
- Secondary market transactions are subject to Swiss federal stamp duty (TK22).

Negative Interest

If, due to unusual market conditions, the interest component is negative, the interest income shall be deemed to be zero and no expense shall be incurred. The negative interest therefore does not constitute either debit interest, as defined in Article 33 of the Swiss Federal Direct Taxation Act (LIFD), or any other expense and is thus not tax deductible. It may not be offset by credit interest when calculating taxable income or any withholding tax.
