PRODUCT DESCRIPTION

These products are characterized by possible attractive Coupon payments. If all Underlyings close at or above their Coupon Levels on a Coupon Monitoring Date, a Coupon with a memory effect is paid out. Memory effect means that Coupon payments which are not made may be provided at a later Coupon Payment Date. If all Underlyings close at or above their Autocall Levels on a Monitoring Date, the product is repaid early. Together with the Nominal Value, a Coupon with a memory effect is paid out which is calculated on the relevant Coupon Monitoring Date (for details see "Early Redemption" as well as "Coupon Payments"). If no Early Redemption has been made, the following settlement conditions shall apply upon maturity: If at Final Fixing all the Underlyings are higher than or equal to the respective Strike Prices, the Nominal Value is repaid. If at Final Fixing at least one of the Underlyings is lower than the corresponding Strike Price, the investor receives the delivery of the Underlying with the poorest performance or a cash compensation, corresponding to the closing price of this Underlying (for details see "Redemption/Delivery").

In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA. The investors bear the issuer's or the guarantor's credit risk.

PROSPECTS OF PROFIT AND LOSSES

Any possible gain results from the possible coupon payments (for details see "Coupon Payment"). Nevertheless, there is an upper limit to the gain, as the maximum payment is the Nominal Value plus the possible coupons (for details see "Coupon Payment").

If all the Underlyings close at or above their Autocall Levels on a Monitoring Date, the product is repaid early (detail see "Early Redemption").

These products have no capital protection. Accordingly, the risks are considerable; given upwardly limited chances of gains, they correspond largely to the risks of a direct investment in the Underlying with the poorest performance. The lower the closing price of the Underlying with the poorest performance the greater the losses sustained. Apart from the Coupon Payments, in extreme cases, i.e. when the price of the Underlying is equal to zero (0), the maximum loss can lead to a loss of all the capital invested.

Even if the performance of the Underlyings is positive the price of the product during the term can be considerably below the Issue Price. Potential investors should bear in mind that price changes to the Underlyings, as well as other influencing factors, may have a negative effect on the value of products.

SIGNIFICANT RISKS FOR INVESTORS

Currency risks

If the Underlying or Underlyings is/are denominated in a currency other than the product's Reference Currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the Underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks

The general market performance of Securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the product.

Disruption risks

There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the products. Such occurrences can have an effect on the time of redemption and/or on the value of the products.

In the event of trading restrictions, sanctions and similar occurrences, the Issuer is entitled, for the purpose of calculating the value of the product, to include at its own discretion the Underlying instruments at their most recently traded price, at a fair value to be established at its sole discretion or indeed as worthless, and/or additionally to suspend pricing in the product or liquidate the product prematurely.

Secondary market risks

Under normal market conditions, the Issuer or the Lead Manager intend to post bid- and ask-prices on a regular basis. However, neither the Issuer nor the Lead Manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the products on a specific date or at a specific price.

Issuer risk

The value of Structured Products may depend not only on the performance of the Underlying(s), but also on the creditworthiness of the Issuer and the Guarantor, which may change during the term of the Structured Product. The investor is exposed to the risk of default of the Issuer and the Guarantor. For further information on the rating of Bank Vontobel AG or Vontobel Holding AG, please see the Base Prospectus.

Risks relating to potential conflicts of interest

There may be conflicts of interest at the Vontobel Group companies that could have a negative impact on the value of the Structured Products. For example, Vontobel Group companies may enter into or participate in trading and hedging transactions relating to the Underlying. They may also perform other functions relating to the Structured Products (e.g. as Calculation Agent, Index Sponsor and/or Market Maker) which enable them to determine the composition of the Underlying or calculate its value. Vontobel Group companies may also receive non-public information relating to the Underlying. It should also be noted that the payment of distribution fees and other commissions to financial intermediaries could result in conflicts of interest to the detriment of the investor, as this could create an incentive for the financial intermediary to distribute products with a higher commission preferentially to its clients. As market maker, Vontobel Group companies can determine the price of Structured Products themselves to a large extent and determine it on the basis of various factors and earnings considerations.

Please also note the further, detailed description of potential conflicts of interest and their impact on the value of the Structured Products as contained in the Base Prospectus.
